## Sytrinol® **NON GMO**

- Lower Total Cholesterol
- Lower LDL Cholesterol

Cardiovascular diseases are the leading cause of death in Canada. One of the biggest risk factors is high cholesterol. Studies have shown that Sytrinol is able to lower your total cholesterol, bad cholesterol (LDL), and triglycerides in 30 days. Sytrinol has also been shown to increase good cholesterol (HDL) levels.

Sytrinol is a powerful antioxidant with numerous heart health benefits. Sytrinol is a patented formula derived from natural citrus and palm fruit extracts. It combines polymethoxylated flavones (PMFs), delta, gamma, and alpha tocotrienols.

Clinical trials have shown that Sytrinol acts synergistically to improve total cholesterol by 30%, lower LDL cholesterol by 27%, and reduce triglycerides by 34% (compared to a placebo). Sytrinol has also been shown to increase HDL

levels. To date three major studies have been carried out to investigate Sytrinol's effects on cholesterol levels.

The first study involved 60 participants with raised cholesterol levels. After taking 300mg of Sytrinol each day for four weeks, the researchers found that the treatment lowered total cholesterol by 25%, the bad LDL cholesterol by 19%, and triglycerides by 24%.

In the second smaller study, 10 subjects with elevated cholesterol levels benefited after four weeks of treatment with 300mg of Sytrinol per day. Sytrinol therapy lowered total cholesterol levels by 20%, LDL cholesterol by 22%, apolipoprotein B (a component of LDL) by 21%, and triglycerides by 28%. Additionally, subjects in this trial benefitted from a significant 5% increase in apolipoprotein A1 an important structural protein of the good HDL cholesterol.

A third clinical trial involved 120 patients with moderately elevated cholesterol levels. Compared to the placebo group, subjects taking Sytrinol had a decrease of 30% in total cholesterol, 27% in LDL cholesterol, and 34% in triglycerides. In addition, HDL levels increased by 4 per cent, resulting in a significant 29% improvement in the LDL: HDL ratio.

### Each Capsule Contains:

#### Medicinal Ingredients:

Mandarin Orange Extract (*Citrus nobilis*) (peel) (36% polymethoxylated flavones) ..... 270 mg  
 Palm Oil Extract (*Elaeis guineensis*) (seed oil) (15% tocotrienols) ..... 30 mg

**Non-medicinal Ingredients:** Microcrystalline cellulose, gelatin capsule (gelatin, purified water), magnesium stearate, silica.

**Recommended Adult Dose:** 1 capsule daily with food or as directed by a health care practitioner. Use for a minimum of 4 weeks to see beneficial results. Consult a health care practitioner for use beyond 12 weeks.

**CODE:** 0114-30 veg caps, 0113-60 veg caps **NPN:** 80033137

Preferred Nutrition **PNO.CA**
